HOTEL AUTOMATION

Guest Room automation

We aim to redefine a new dimension of luxury & relaxation.

Increase guest comfort for a new and unique experience

The Guest Room Automation System enables hotel guests to experience enhanced comfort through smart bed-side panel, which allow them to operate all the systems in their room such as lights, air-conditioner, TV, music system etc., from the comfort of their bed with a touch.

The objective is to consistently satisfy guest's needs and expectations in their rooms. They will appreciate the ability to control the lighting, the curtains, the temperature and the fan easily through the user friendly interfaces.

The most MEMORABLE rest time starts here.
