Smart Touch Switches

Inventing Smart Systems

Seamless home automation and control solutions

Fox Domotics has laid the foundation for technology innovation, since 2006. We develop automation technologies that improve people's lives by making everyday tasks easier and increasing efficiency and productivity.

In order to create the highest level of quality achievable in every respect, our engineers toil with dedication and precision. Fox Domotics products continue to set new standards in technology, design, content, and processing, while also providing a high level of service to all of our customers. Fox Domotics, as a leading touch switch manufacturer, has set new standards of excellence for all our product range. All Fox Domotics products have that 'heavy quality and durability in them', ensuring precise performance for several years to come.

With Fox Domotics you aren't just buying top-of-the-line electronics, you're also investing in scalable and customizable solutions, and sponsoring products that are designed and manufactured in India.

Fox Domotics touch switches can be used to aesthetically highlight the interior of a room or smoothly integrate themselves into the room.

HOTEL AUTOMATION
Guest Room automation

We aim to redefine a new dimension of luxury & relaxation.

Increase guest comfort for a new and unique experience

The Guest Room Automation System enables hotel guests to experience enhanced comfort through smart bed-side panel, which allow them to operate all the systems in their room such as lights, air-conditioner, TV, music system etc., from the comfort of their bed with a touch.

The objective is to consistently satisfy guest's needs and expectations in their rooms. They will appreciate the ability to control the lighting, the curtains, the temperature and the fan easily through the user friendly interfaces.
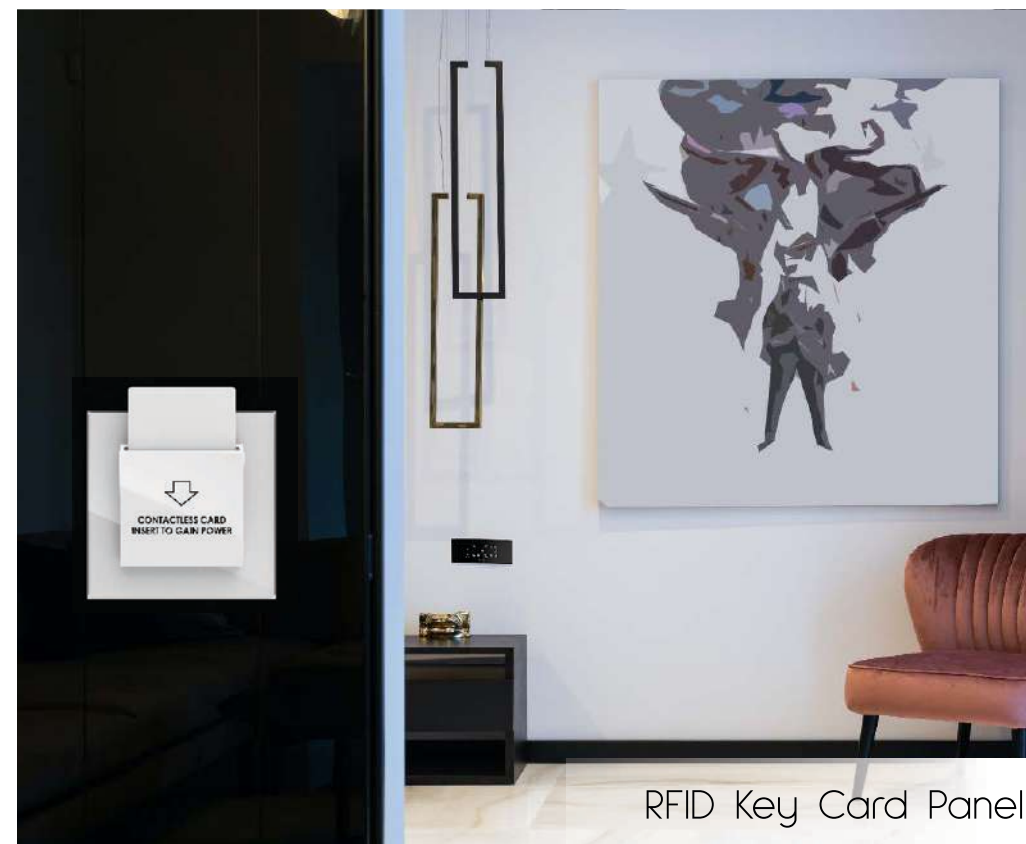

The most MEMORABLE rest time starts here.

TV Lift
## Swing Door MOTOR

TV LIFT MOTOR

FEATURES

We provide reliable, ultra quiet, motorized TV lifts that are ideal for industry professionals, commercial and residential. Every TV lift mechanism is manufactured in India and backed by a full 1 year warranty, making it the perfect buy for any professional or individual.

We provide complete media control systems like TV, Set Top Box, music systems etc. can be controlled through mobile apps (Android and iPhone). This is very important in home automation as multiple remote comes in one app and hence very easy to control. Also you can hide set top box and music system and control it through mobile apps.
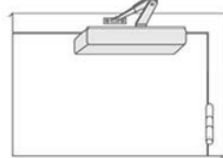

AUTOMATIC SWING DOOR

We are manufacturer of swing door motor. We provide high quality auto swing door motor, manufactured as per the quality norms. These are ideally used in residential lifts, hospitals, commercial buildings, retail outlets, airports, malls, restaurants etc. Our swing door motor has quality feature like smooth functioning, which ensures zero noise production.
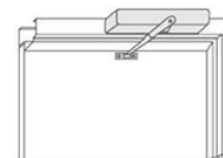

FEATURES

✓ Smooth running without hearable noise
✓ Go function makes life safer and easier
✓ Open & close the door in 90 Degree
✓ Articulated arm and sliding arm both available, can be mounted on the hinge side and opposite hinge side
✓ Fully adjustable operating parameters to suit specific applications and numerous control options

Projector Lift
Rolling Shutter MOTOR

PROJECTOR LIFT MOTOR

FEATURES

✓ Made from High Grade Aluminum material
✓ Very light in weight compare to MS Lift
✓ Provides Tubular Motor for best, accurate and long-lasting performance
✓ Load Capacity : Standard Motor 18kg & Heavy Motor 50kg
✓ Provides cable track system for hide, protect and gather cables when the projector lift is going up and down
✓ Unique cable track design is perfect solution for laying the cables
✓ Special kind of projector mount clamps with spring tension, developed for easy mounting and projection calibration
✓ Fitting clamp for bottom plate with adjustable height and width
✓ Projector upper and lower limit can be locked as per installation requirement
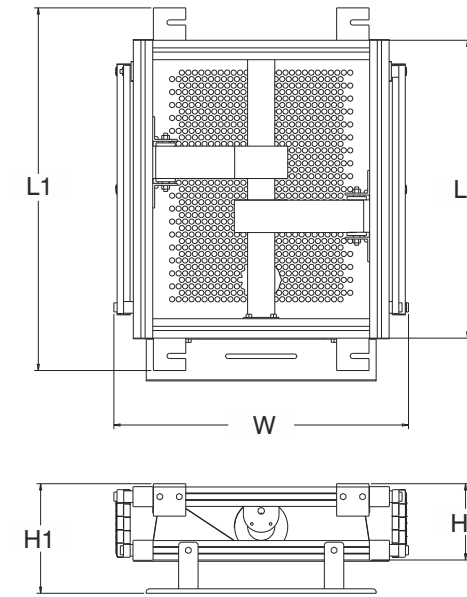

ROLLING SHUTTER MOTOR

FEATURES

✦ Supply manual button and security lock, and can match with remote control (long distance receiver, and easy operation).
✦ Limit switch unit enables precise adjustment of shutter in both up and down position.
✦ In case of absence of power, shutter can be operated manually through release chain.
✦ Stable operation, low noise, small vibration.
